Pennsylvania Conservation Agent

Profile Information:

*[Note: This is a **sample** profile page for parks departments.]*

The Sample State Parks Department welcomes geocachers to its parks. A full list of the state parks in Sample can be found at [www.YourWebsiteHere.com](#). All caches placed in our parks must adhere to the [Geocaching.com requirements and guidelines](#). We have developed our own specific permission to place a new cache in our parks. You can find the process outlined in detail at [www.YourWebsiteHere.com/geocaching](#). Check out our Bookmark Lists for some of the great caches available in our parks. See the Lists tab at the top of this page.

[The sample geocaching policy below has been taken largely from Pennsylvania's State Parks/Forestry Geocaching Guidelines.]

The [Geocache Identification Form](#) (Word doc download) is an application for registration and placement of a geocache on lands administered by the DCNR - Bureau of State Parks and Bureau of Forestry. You must present the form in person to the State Park or State Forest office where you'd like to place the geocache. The geocache site location is subject to review by the Park Manager/District Forester or designee.

The following guidelines apply to all geocaches on State Park and State Forest lands:

- Placement of geocaches on lands administered by the DCNR - Bureau of State Parks / Bureau of Forestry requires authorization of the Park Manager / District Forester or designee. This authorization will be considered through a review process, including a Pennsylvania Natural Diversity Inventory search (PNDI) that insures its location is compatible with other park and forest activities.
- A geocache contact person responsible for necessary upkeep of the site must be identified prior to approval by the Park Manager / District Forester or designee.
- There should be no earth disturbance or vegetative impact to any approved site.
- The cache should not be readily discernible by the general public.
- All cache seekers and cache owners must abide by park/forestry hours and all other park/forestry rules and regulations.
- The cache may not be placed within Natural Areas, Penn Nursery perimeter fence, seed orchards, or Wild Plant Sanctuaries, or on stream banks, riparian zones, wetlands, prehistoric and historic archaeological sites, exemplary natural communities, ecologically sensitive areas, unique geological features, dam structures, or unsafe areas. You must contact the Park Manager / District Forester for possible additional restrictions or questions concerning the proposed location.
- Responsible party shall delete site location(s) from all publications and/or website(s) within seven days of removal.
